Al-Khulu' Compensation: The Case of Being Above Dower (al-Mahr)

Naser Elddin Shaer*

ABSTRACT

This research deals with one aspect of al-(Khulu') "divorce at the instance of the wife who has the right to end undesired marriage when she is unwilling, or unable to go on with her marriage". This aspect is the amount of compensation of al-Khulu' that is paid in return by the wife to her husband, on the basis of religious scripts, scholars' views and according to its practice in "Personal Law".

This research calls for reconsidering the prevailing stand that takes away this right from women, by asking her to pay more than the dower (al-Mahr).

Keywords: Al-Khulu', Compensation, Al-Mahr.
